

## Bright and BeeGFS Share Plans for TERATEC 2018 Forum

**Wednesday June 6, 2018 - Amsterdam, Netherlands; Kaiserslautern, Germany**– Today, [Bright Computing](#), a global leader in cluster and cloud infrastructure automation software, announced that the company will co-exhibit with [ThinkParQ](#) at the TERATEC Forum (booth #6), taking place June 19 and 20, at Ecole Polytechnique in France.

The [TERATEC Forum](#) is a major event in France that brings together many international experts in HPC, Simulation and Big Data. The event welcomes more than 1,300 attendees, highlighting the technological and industrial dynamism of HPC and the essential role that France plays in this field.

At the TERATEC exhibition, Bright Computing will co-exhibit with [ThinkParQ](#), the company behind the leading parallel cluster file system [BeeGFS](#), developed with a strong focus on performance and flexibility. Together, the companies will demonstrate the value that the seamless integration between the two technologies brings to HPC platforms.

The partnership between ThinkParQ and Bright enables organizations to leverage the full performance of their available hardware while ensuring all components within the HPC environment are easy to manage. With Bright, customers can set up and configure BeeGFS in minutes, to quickly start monitoring the system utilization, helping system administrators to significantly improve the application runtime of their cluster users.

To meet Bright Computing or ThinkParQ at Teratec, please email [pr-team@brightcomputing.com](mailto:pr-team@brightcomputing.com) or [sales@thinkparq.com](mailto:sales@thinkparq.com).
